

ML RENTAL MANAGEMENT SYSTEM

Central Accounting Division

System Guide

USER GUIDE

INTRODUCTION

The **ML Rental Management System** is a centralized and intelligent platform designed to efficiently monitor and manage rental payments across all branches nationwide. It provides real-time tracking of rental obligations, ensuring accurate payment monitoring and improved financial transparency.

With its comprehensive reporting capabilities, users can easily generate detailed financial reports, review payment histories, and analyze branch performance. The system also streamlines the payment process by enabling fast and secure disbursement to lessors through multiple company-approved payment modes.

By automating rental computations, payment scheduling, and reporting processes, the system reduces manual errors, increases operational efficiency, and ensures timely compliance with contractual obligations.

This solution empowers organizations to maintain full control of their rental operations while improving accuracy, speed, and overall financial management.

SYSTEM USERS

Area Manager – Creates rental contracts and submits payment requests for assigned branches.

Regional Manager – Reviews and validates contracts and payment requests within the region.

VPO - Provides final approval for contracts and payment requests before authorization.

Audit - Conducts compliance review to ensure accuracy, transparency, and policy adherence.

Finance - Reviews and approves contracts and payment requests to ensure budget availability, financial accuracy, and proper fund allocation.
